

Year 8 Message from Liverpool School Based Immunisation Services

Dear year 8 Parents/Carers

All Year 8 children are being offered the HPV immunisation which protects against a range of HPV related cancers. Please access the below link for further information and complete your child's form even if you DO NOT want your child to receive this immunisation as this will avoid you receiving further correspondence from our service and assist with campaign delivery.

<https://econsent.merseycare.nhs.uk/>

If you would like to discuss anything further, amend your child's form or require support, please don't hesitate to contact the immunisation service on 0151 295 3833.

Please do not re-submit a further form.

Many Thanks,

Liverpool School Based Immunisation Services

Year 9 Message from Liverpool School Based Immunisation Services

Dear year 9 Parents/Carers

All year 9 children are due routine immunisations to boost their antibodies and ensure they remain protected against Diphtheria, Tetanus, Polio, and Meningitis ACWY into adulthood. Also, if your child missed their HPV immunisation in year 8. It's not too late.

Please access the below link for further information and complete your child's form even if you DO NOT want your child to receive any immunisations, as this will avoid you receiving further correspondence from our service and assist with campaign delivery.

<https://econsent.merseycare.nhs.uk/>

If you would like to discuss anything further, amend your child's consent form or require support, please don't hesitate to contact the immunisation service on 0151 295 3833.

Please do not re-submit a further form.

Many Thanks,

Liverpool School Based Immunisation Services

Year 10 Message from Liverpool School Based Immunisation Services Dear year 10

Dear year 10 Parents/Carers

Did your child miss any school immunisations? It's never too late to get protected.

If you are not sure, please don't hesitate to contact the immunisation service on 0151 295 3833 who will be happy to check your child's immunisation records.

Secondary school children are offered immunisations to protect them against HPV related cancers and boost their antibodies against Diphtheria, Tetanus, Polio and Meningitis ACWY ensuring they are protected into adulthood. Please access the below link if your child has missed any routine immunisations and complete the relevant forms.
